

# Join Lib Dem Campaign to stop the spread of TB

In its wisdom the last Labour government cancelled universal inoculation against TB. Now less than a decade later this defeated disease is on the increase. At any one time hundreds of active cases are being treated in Birmingham. Liberal Democrats are calling for increased action to tackle TB before it reaches epidemic numbers.

Please add your voice to our campaign by signing the petition below.

*I / We the undersigned are deeply concerned at the increasing numbers of TB cases in Birmingham and insist action is taken to halt its spread. If necessary mass immunisation of young people should be re-introduced.*
